Overview of the Course

Overview of the Course

Defining a Business Problem

Converting Business Problem into Data Science Problem

Hypothesis Generation & Data Collection

Data Exploration and Preprocessing

Feature Engineering and Model Building

Model Tuning

Ensemble Models

Sharing Results with Stakeholders

Analytics Vidhya
Learn everything about analytics

Overview of the Course

Defining a Business Problem	Converting Business Problem into Data Science Problem	Hypothesis Generation & Data Collection	Data Exploration and Preprocessing
Feature Engineering and Model Building	Model Tuning	Ensemble Models	Sharing Results with Stakeholders

Overview of the Course

Defining a Business Problem	Converting Business Problem into Data Science Problem	**Hypothesis Generation & Data Collection**	Data Exploration and Preprocessing
Feature Engineering and Model Building	Model Tuning	Ensemble Models	Sharing Results with Stakeholders
